- Must fill in the fields of the properties of the selected service.
- If it does not find the service to be provided, it should be a panel that will communicate with site administrators.
- The service contract must be and user must be approved.

Admin Panel (7, 8)

- All users should be able to see it dynamically.
- All sites must be viewable.
- Add, remove and edit categories.
- Users must be able to block.
- Communication users with users should be possible.

System Stakeholders

- Admin
- Hizmet Veren
- Hizmet Alan

Functional Requirements

Admin

- Admin can log in to the system.
- Admin can view users in the system.
- Admin can edit user information in the system.
- User can be deleted from admin system.
- Admin can add or remove new categories, or edit existing categories.
- Admin users can block.
- Admin can display blocked users.
- Admin can view user conversations.
- Admin can remove and edit comments about the user.

Hizmet veren

- The "Hizmet Veren" system may register.
- The "Hizmet Veren" user can enter the system with the information.
- It can edit and update account information for "Hizmet Veren" accounts.
- The "Hizmet Veren" may send a message to another "Hizmet Veren" user.
- It can display "Hizmet Veren" past chats.
- It can search on the "Hizmet Veren" system.
- The "Hizmet Veren" can comment on the services it receives.
- The "Hizmet Veren" may arrange comments made by other service providers.
- The "Hizmet Veren" profile can show how many people have entered.
- "Hizmet Veren" users may block.
- The "Hizmet Veren" may communicate with the person receiving the service.
- The "Hizmet Veren" can name the person who receives the service.
- "Hizmet Veren" can filter on the search screen.
- The "Hizmet Veren" users can sort by the number.
- It may close the "Hizmet Veren" account.
- The "Hizmet Veren" message history can be cleared.

Hizmet Alan

- "Hizmet Alan" can register to the system.
- "Hizmet Alan" can login to the system with user information.
- "Hizmet Alan" can edit and update account information.
- "Hizmet Alan" can send a message to the serving user.
- "Hizmet Alan" can view past conversations.
- "Hizmet Alan" can search on the system.
- "Hizmet Alan" can comment on people who have been served.
- "Hizmet Alan" can edit comments it's made.
- "Hizmet Alan" can filter on the search screen.
- "Hizmet Alan" users can sort by rate.
- "Hizmet Alan" may vote for the person he serves.
- "Hizmet Alan" can block users.
- "Hizmet Alan" can turn off his account.
- "Hizmet Alan" can delete the message history.

Non-Functional Requirements

Product Requirements

- Notifications should be communicated quickly to the user.
- The software should support 100 million users.
- The software should work on all Windows, Linux and MacOS versions.
- The software must be mobile-compatible.
- The software will provide 90% uptime.
- The system must be secure. User information must be protected.
- It should offer high performance to the user (such as filtering within 1 second)

Organizational Requirement

- The user must confirm their account information via email.
- The user should provide an easy interface.
- The user should provide good service quality.
- The system should proceed in line with the stated mission and vision.
- Notifications should be communicated quickly to the user.
- Hints should be given to the user about the use of the system.

External Requirements

- The user must submit a contract and privacy policy.
- Security of user information should be provided.

Usability Requirements

The user interface of the system will be very simple. By using the computer through the Aranyor.ml, admin, "Hizmet alan" and "Hizmet veren" will be able to use easily. Their learning and use is very easy. It is enough for users to click on what they want. Our interface is simple, understandable and easy. Effectiveness of use: It is easy to reach the targets quickly and easily with few mistakes. Users can access the system via facebook or gmail accounts. The user can change the position on any page. Tips should be given to the user about the use of the system. Customers and service providers should be able to communicate directly with each other. Admin users should be able to see and navigate easily.

Intuitiveness: the interface is easy to learn and navigate; buttons, headers and help / error messages are easy to understand.

Low workload perception: The interface seems very frustrating and annoying, easy to use.

Scenarios

Sign In and Entering Scenario

Ahmet moved to a new quarters. There is no recognition in the district he is in, and the new home is in need of care. He should paint the house and repair the taps. But since Ahmet does not know anybody around there, he does not have any idea where he will reach those who will do those renovations. What I am going to do is to find that your friend has already enjoyed using it and recommended it to him. The website comes to mind. You reach your website by searching through Google. Ahmet needs to be a member in order to use the application. Ahmet is also active facebook user. The site has been subscribed to the site by using the 'Register with Facebook' option.

Search to Service Provider in System

Selin will go on holiday with his family. However, during the preparation, the mind has been put in serious detail. Where will the Selin leave the dog, Nuri? The hotel does not

accept pets for the holidays. Selin has to entrust somebody to nuriyi, and any relatives do not accept nuriyi. Selin thinks that he can solve this problem through his website. Logging in .ml will select the dog care section under pet care from the categories section. It is searched for by the convenience that the ML offers to him, and by using the filtering feature according to the city and the sidekick, Tutkuya, a professional dog carer, is reached.

Send Message to Service Provider From System

Selin will go on holiday with his family. However, during the preparation, the mind has been put in serious detail. Where will the Selin leave the dog, Nuri? The hotel did not accept pets for the holidays. Selin had to entrust somebody to the nuriy and did not accept any relatives. Selin thinks that he can solve this problem through his website. Logging in .ml will select the dog care section under pet care from the categories section. It is searched for by the convenience that the ML offers to him, and by using the filtering feature according to the city and the sidekick, Tutkuya, a professional dog carer, is reached. Selin Tutkun examines the profile and then decides that he is the person he is looking for. Click on the send message button to communicate with your passion. Then they will talk about the subject.

Block the Disturbing User

Laçın lives alone in Izmir. When she wakes up in the morning, she gets a big surprise when she goes to the bathroom to break her face. After throwing her teeth in the night, she forgot her taps and this caused the house to flood. As a result of long efforts, Lacin cleared the bathtub, but the water caused the furniture to bloom. By using the web site, Selim came to the master and changed the furniture. Master Selim has liked the Laçın and is looking for communication again on araniyor.ml . This situation, which is very uncomfortable in this situation, is used to block the user who has been offered to her by the Lacin site, which prevents the master Selim and annoying situation.

Voting of the Person Serving

Selin will go on holiday with his family. However, during the preparation, the mind has been put in serious detail. Where will the Selin leave the dog, Nuri? The hotel did not accept pets for the holidays. Selin had to entrust somebody to the nuri and did not accept any relatives. Selin thinks that she can solve this problem through his website. Logging in araniyor.ml will select the dog care section under pet care from the categories section. It is searched for by the convenience that the araniyor.ml offers to her, and by using the filtering feature according to the city and the sidekick, to Tutku, a professional dog carer, is reached. Selin examines the Tutlu's profile and then decides that she is the person she is looking for. Click on the send message button to communicate with Tutku. Then they will talk about the subject. In the morning when they will go on a trip, Tutku will be delivered. At the end of the day, Tutku takes care of Nuri for 1 week and delivers Nuri. Selin is very surprised. Because she has received Nuri very healthy delivery. Selin, who is quite satisfied with Tutku, is being searched for helping herself and helping other people.

Comment on the Service Provider

Selin will go on holiday with his family. However, during the preparation, the mind has been put in serious detail. Where will the Selin leave the dog, Nuri? The hotel did not accept pets for the holidays. Selin thinks that she can solve this problem through website which is araniyor.ml . Logging in araniyor.ml will select the dog care section under pet care from the categories section. It is searched for by the convenience that the araniyor.ml offers to her, and by using the filtering feature according to the city and the sidekick, to Tutku, a professional dog carer, is reached. Selin examines the Tutku's profile and then decides that she is the person she is looking for. Click on the send message button to communicate with Tutku. Then they will talk about the subject. In the morning when they will go on a trip, Tutku will be delivered. At the end of the day, Tutku takes care of Nuri for 1 week and deliver to Nuri. Selin, who is quite satisfied with Tutku, is wanted to help Tutku and also to help other people so she subscribed and rate to Tutku.

Being a Service Provider on the System

Burak is a senior at Computer Engineering. He has greatly improved himself in web design. He wants to further develop himself with new projects and at the same time to support his family in financial terms. Burak, who is an active user of araniyor.ml, thinks that he may also serve on the site. After logging in to the site and filling the required fields by clicking on the service provider button, the system is now among the service providers.

View of User Panels

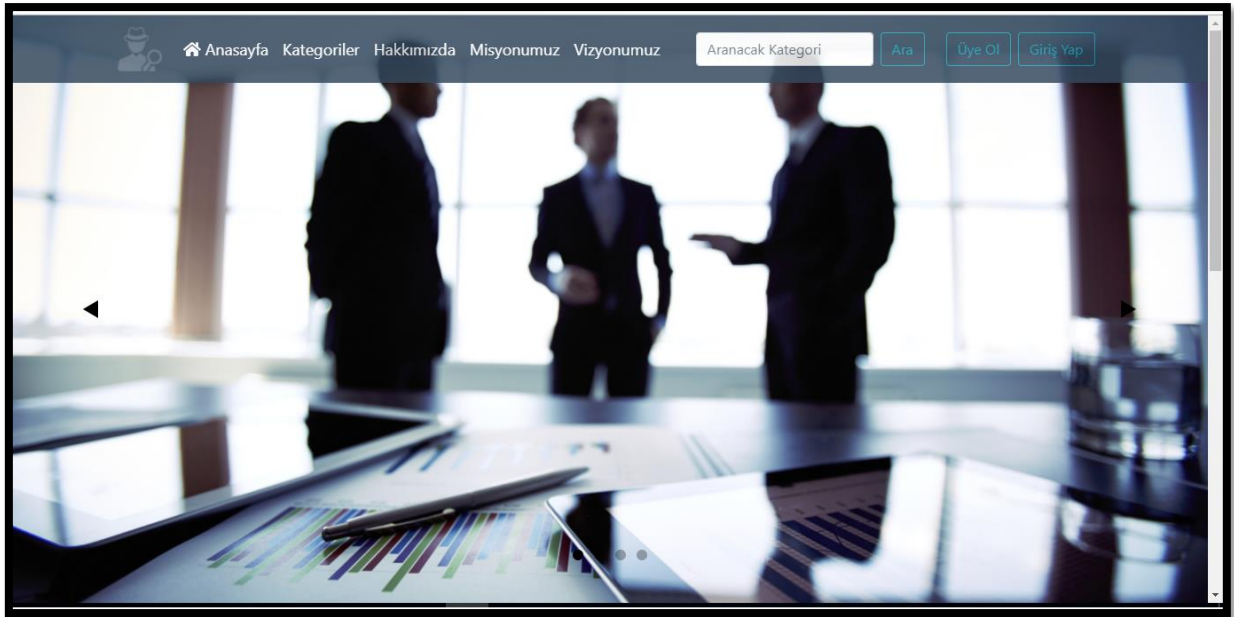

Figure3: View of Website

Admin Panel

Admin panel is a panel where admin users manage the website. Admin users can perform the operations in the admin panel of their website as they like. This panel includes Category Operations, Blocked Users, User Operations, Comment Operations, Message Operations, Scoring Operations and About Us Operations. The Admin user can easily make changes to the desired area.

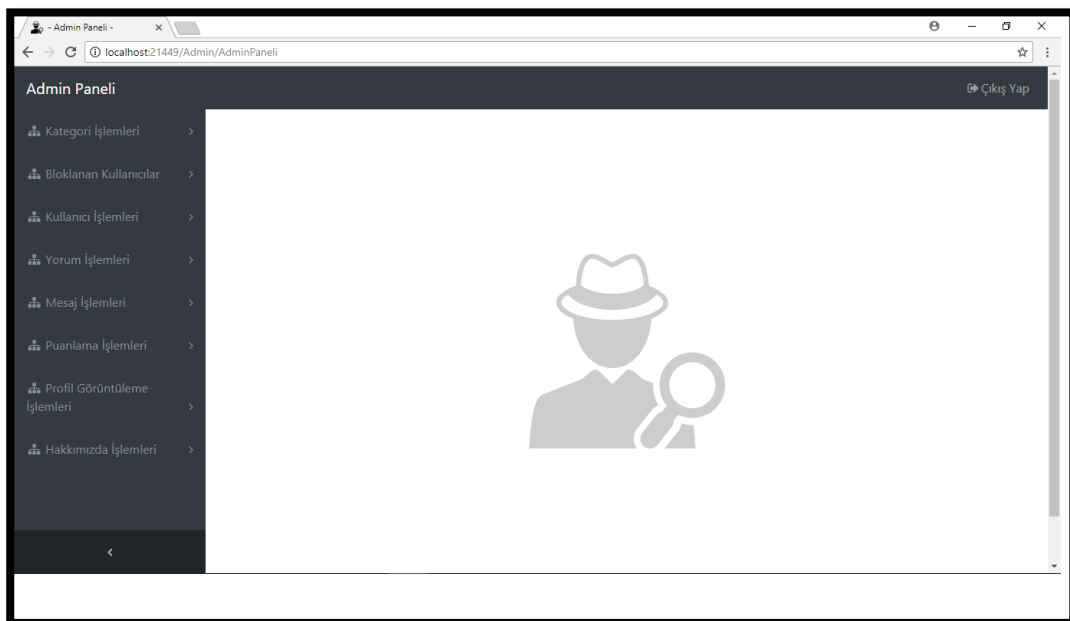

Figure4: View of Admin Panel

Users will also display the home page of the first time you open the site. According to the requests, Categories can view the sections, About Us, Our Mission and Our Vision. They should log in to the website in order to get more efficiency from the website and to use the site in full. After clicking on the "Login" button on the home page, the following panel will appear. Users login to the system with their e-mail addresses and passwords. User login to the system with their e-mail address and password.

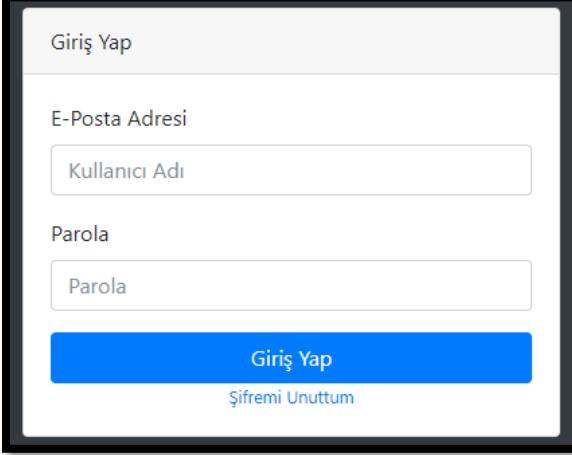

A login form titled "Giriş Yap" (Login). It contains two input fields: "E-Posta Adresi" (Email Address) with a placeholder "Kullanıcı Adı" (Username) and "Parola" (Password) with a placeholder "Parola". Below the fields is a blue "Giriş Yap" button and a link "Şifremi Unuttum" (Forgot my password).

Figure5: Login System

Only Admin can log in to Admin panel. Other users can not log in. Also, when an incorrect e-mail address or password is entered while login to the web site by admin, the system displays a message warning to the admin user to check the information and try again. When you check the Admin information and re-enter the information stored in the system properly, you can log in and display the admin panel.

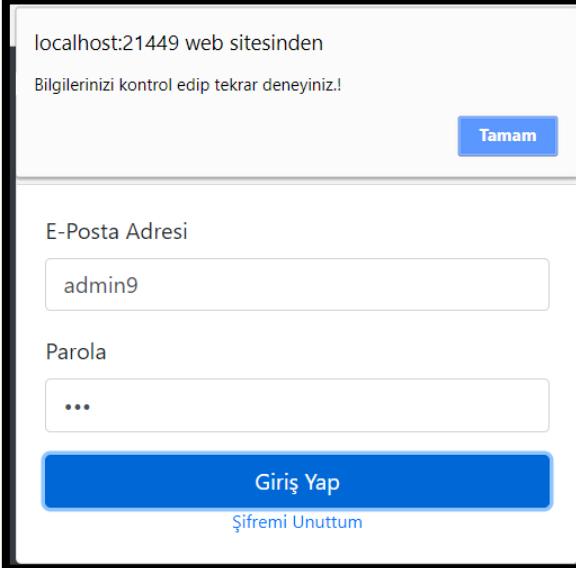

An admin login form. At the top, it displays a warning message: "localhost:21449 web sitesinden" and "Bilgilerinizi kontrol edip tekrar deneyiniz.!" (Check your information and try again!). There is a blue "Tamam" (OK) button next to the message. Below the message are two input fields: "E-Posta Adresi" (Email Address) with the value "admin9" and "Parola" (Password) with three dots "..." indicating a masked password. At the bottom is a blue "Giriş Yap" button and a link "Şifremi Unuttum" (Forgot my password).

Figure6: Admin Login

If you forget your password when you login to Admin, click on the Forgot Password button and the Forgot Password window opens. Admin writes the e-mail address registered in the site. If the

e-mail address is not registered in the system, it will give a warning. The e-mail integrity on the system, the existing password is sent from info@araniyor.ml .

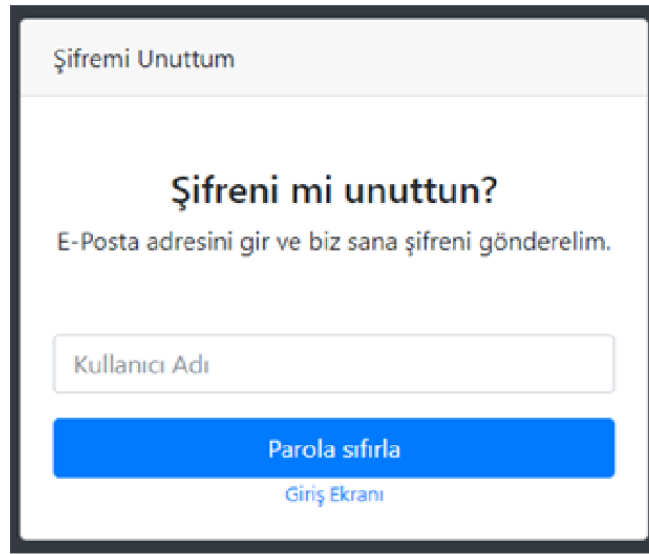

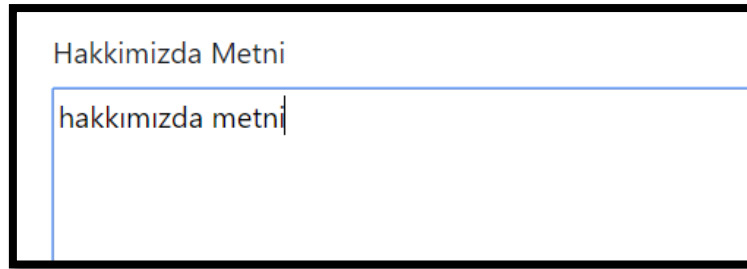

Figure7: Forget Password

The images in the slider can be changed as desired from the admin panel. After login to admin, admin panel, there are four sliders in the homepage of the website which are displayed by the user. Admin can change these photos as you like. But these photos should have the extension .jpg, .jpeg, .bmp, .png. Otherwise, the system will fail with an error.

Figure8: Profil Image

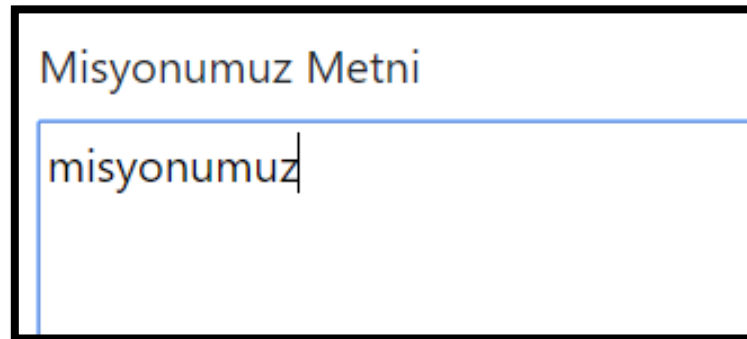

About us, vision, mission texts and visuals can be changed from admin panel. The text of our Home, Our Vision and Mission can be changed as desired by the admin who logs in to the system as admin and displays the admin panel.

Figure38: List of blocked users

When a new user is created, no other user with the same user name is created and the user is notified by the system.

Figure39: Same user name notification

When wrong e-mail address is entered, system notifies the user.

Figure40: Invalid e-mail address

If the service provider is selected, system notifies the user if all required fields are not filled. Users can be searched. When they become a member or become a member, they can serve the system according to their preferences. If you select the option shown in Figure 41, the user should also record more information about the system itself. If it does not register, the service provider does not. And the user comes up with a warning that he needs to fill in all the fields.

Figure41: Service provider button

Figure42: Fields must be fill

Only integers can be entered in the phone number field. Minimum 10, maximum 15 cn be entered.

Figure43, 44: Notification for only number and at least 10 number

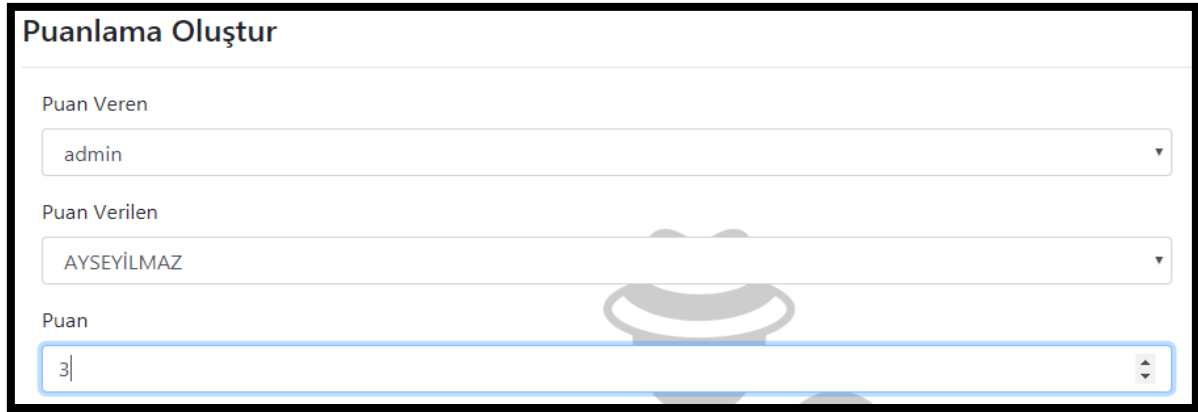

Only integers can be entered in the Experience section. User can not enter number bigger than 100.

Figure45: Writing experience

User can not comment on himself and the system will give a warning. If the user name of the commenter and the user who made the comment are the same, the system will warn that the person can not comment on it and the desired comment will not be made.

Figure46: Can not comment on herself

User can score between 0 and 5, after experience with that user. Each user who is a member of the ML site can score each other. These scores are awarded for each other's services.

Using Araniyor.ml Web Site

User view of Araniyor.ml. Every user who opens the .ml site displays the Categories, About Us, Mission, and Vision tabs. There are also members and login tabs.

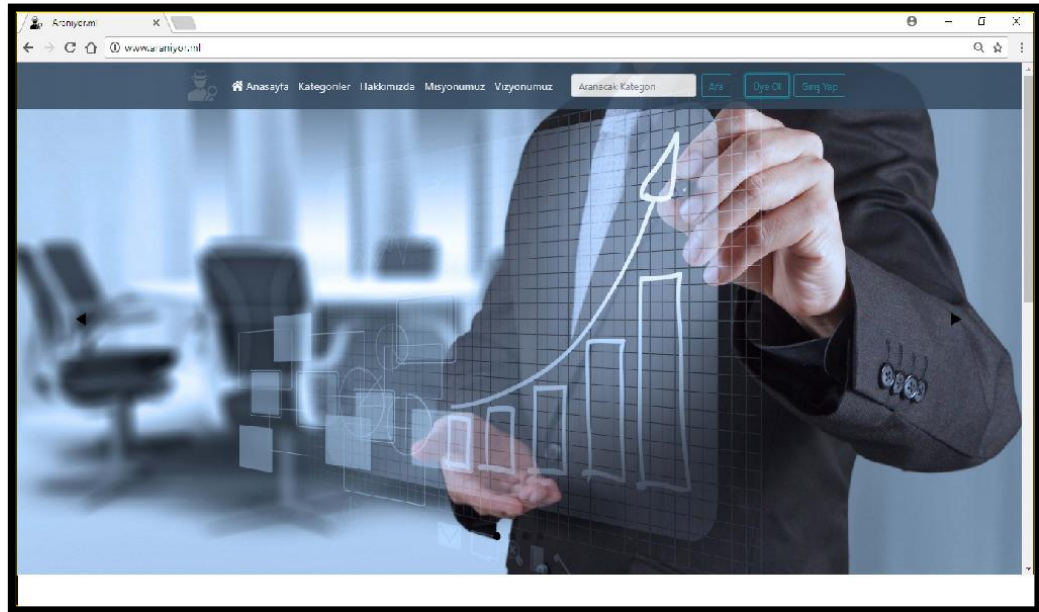

Figure49: User view of website

Membership screen where the user must fill out. The user who wants to become a member of the ML site comes to the screen after he pushes the button on the homepage. The user subscribes with his or her e-mail address, his / her own password, user name, first name and last name.

A screenshot of the membership registration form on the Araniyor.ml website. The form is titled 'Üye Ol' and is overlaid on the homepage background. It contains the following fields: 'E-Posta Adresi', 'E-Posta', 'Parola', 'Parola Tekrar', 'Parola Tekrar', 'Kullanıcı Adı', 'Kullanıcı Adı', 'İsim', 'Soyisim', 'Soyisim', and 'Soyisim'. At the bottom right of the form are two buttons: 'Geri' and 'Üye Ol'.

Figure50: Membership screen

If the user has already been a member, the site fails and does not register again.

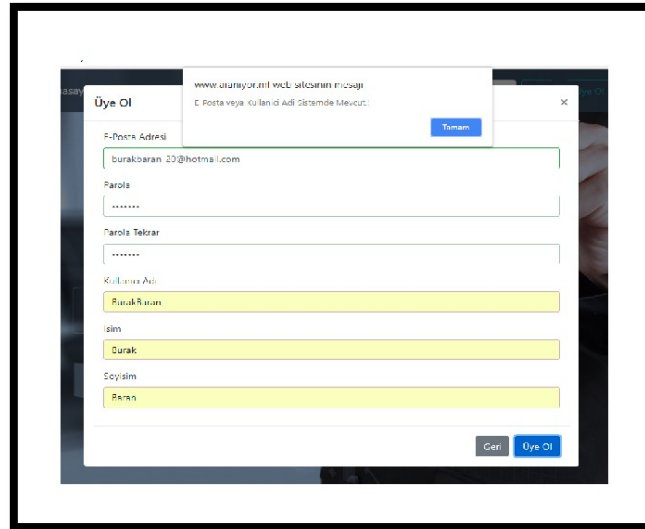

Figure51: Same user can not register again.

Login screen of the website.

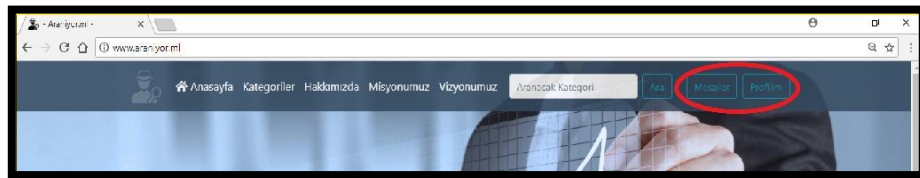

Figure52: Login screen

If the user does not remember the password, the password is sent to the mailing site automatically by the password site.

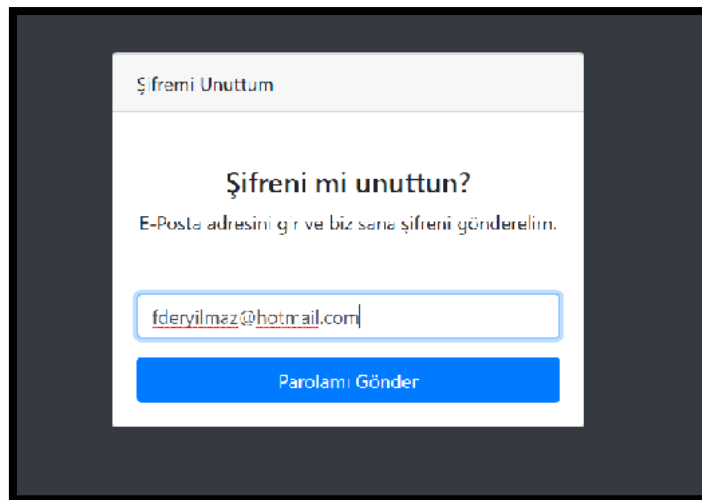

Figure53: Forget password screen

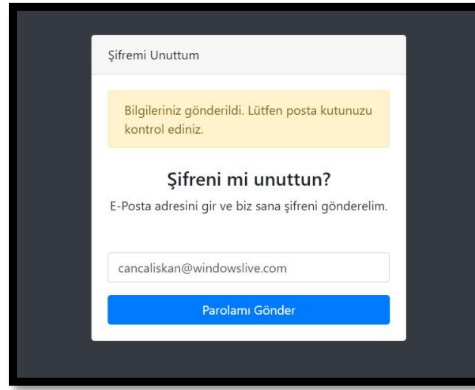

Figure54: Notification screen

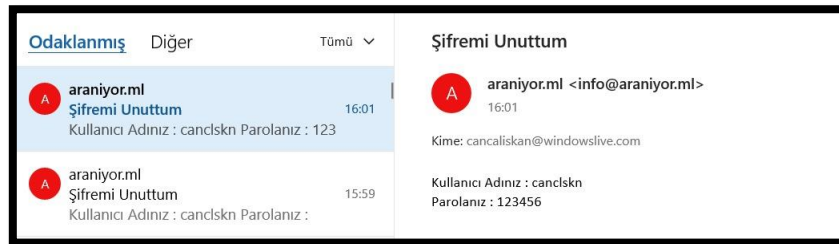

Figure55: Arrived mail to user

When the user log in, user's messages and profile section will appear.

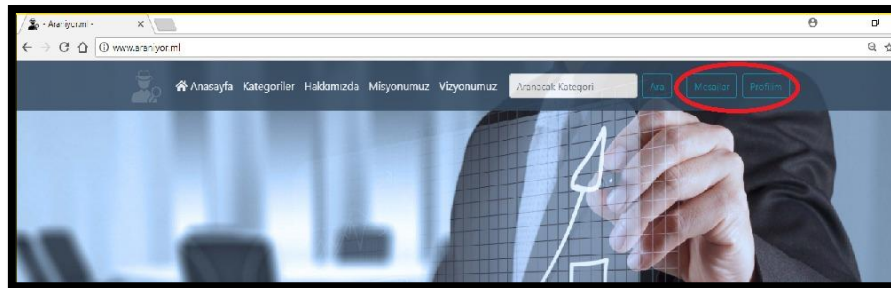

Figure56: Messages and profile buttons

When you reach the profile button, the corresponding tabs are listed.

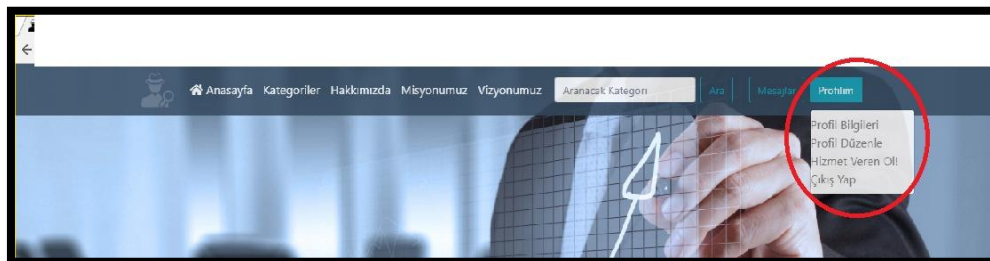

Figure57: Clicking profile button

When the profile information button on the profile button is clicked, the user's profile information appears.

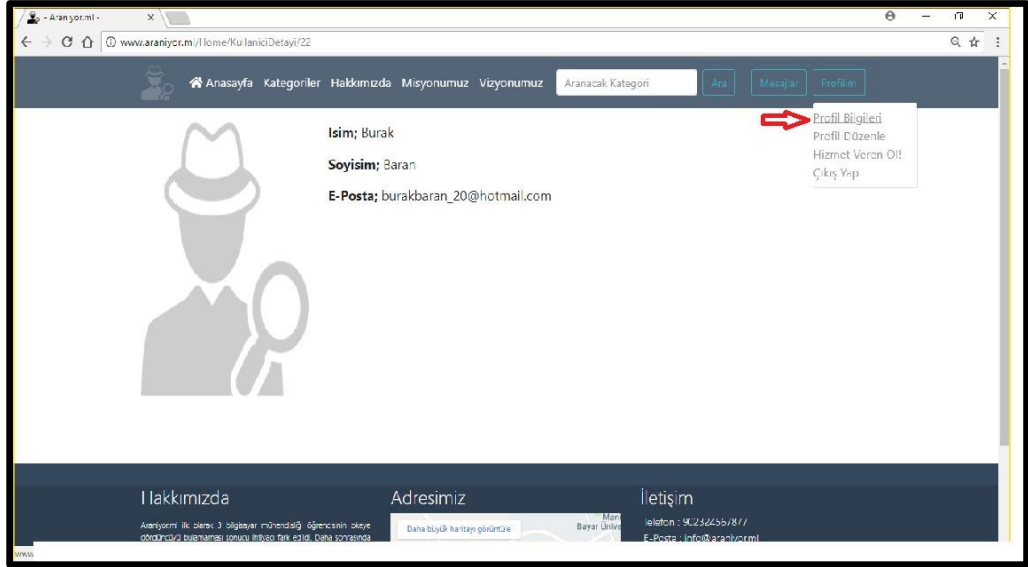

Figure58: Own profile information of user

When you click on the profile editing tab in the profile button, a tab will be opened where the user will edit the profile information.

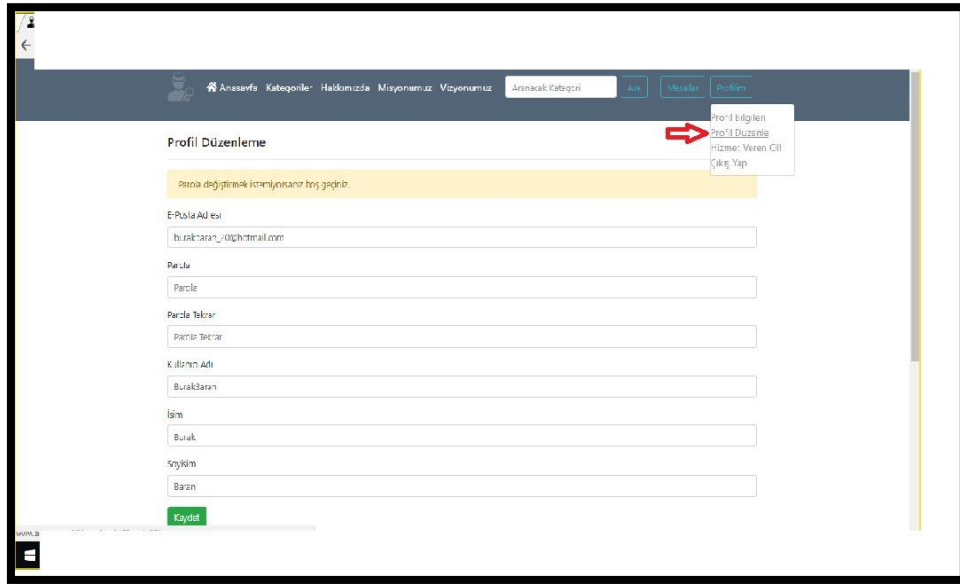

Figure59: Own profile information of user

When you click on the service tab in the Profiles button, the tab that must be filled in must be filled in order for the user to be served.

The screenshot shows the 'Hizmet Veren Ol' page on the Araniyor.ml website. The top navigation bar includes links for 'Anasayfa', 'Kategoriler', 'Hakkımızda', 'Misyonumuz', 'Vizyonumuz', 'Aranacak Kategori', 'Ara', 'Mesajlar', and 'Profilim'. The 'Hizmet Veren Ol' button is highlighted in the 'Profilim' dropdown menu. The main form area has the title 'Hizmet Veren Ol' and the following fields:

- Kategori:** A dropdown menu with the placeholder text '--- Kategori Seçiniz ---'.
- Alt Kategori:** A dropdown menu with the placeholder text 'Alt Kategori Seçiniz'.
- Resim:** A section with a warning icon and the text 'Only pics allowed! (jpg, jpeg, bmp, png)' and a red button that says 'Browse for your pic!'.
- Şehir:** A dropdown menu with the placeholder text 'Şehir Seçiniz'.

Figure60: Being service provider button

Must be filled out on the service provider's desk.

This screenshot shows the same 'Hizmet Veren Ol' form, but with specific data entered into the fields:

- Kategori:** KİŞİSEL İHTİYAÇ
- Alt Kategori:** AVUKAT
- Şehir:** Antalya

The 'Resim' field remains empty with the same warning and 'Browse for your pic!' button. The top navigation bar and the 'Hizmet Veren Ol' button in the 'Profilim' dropdown menu are still visible.

Figure63: Screen of users detail

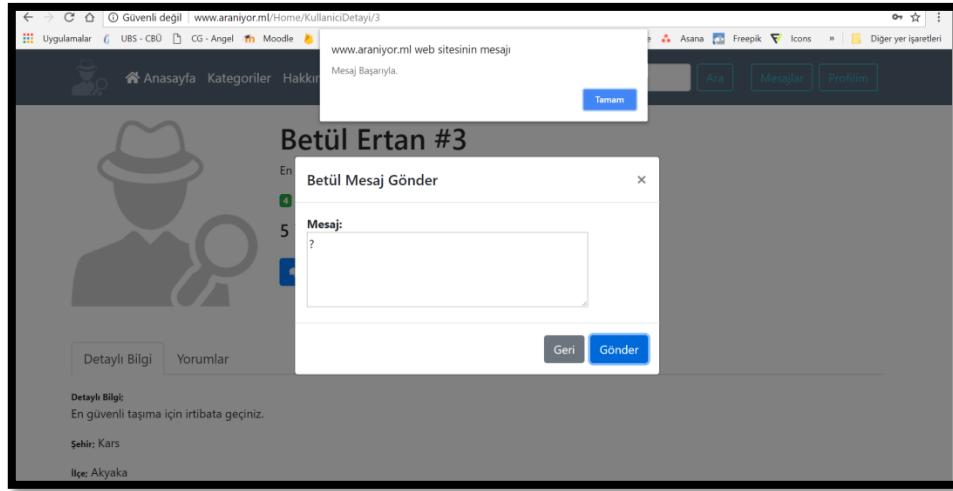

Figure64: Sending message screen

When a message is sent, a message that the message was sent successfully appears on the screen.

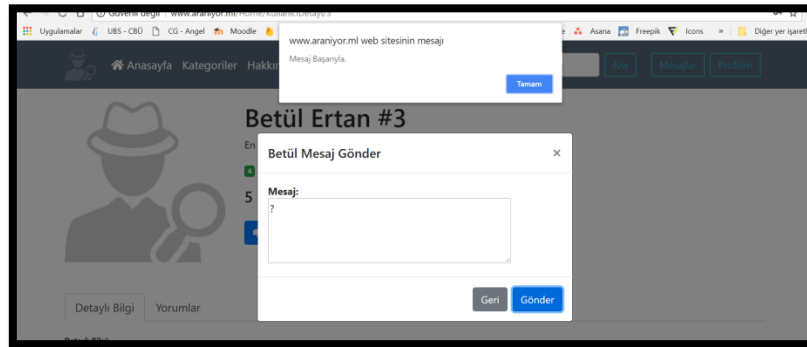

Figure65: Sending message successfully

When the profile of the person is displayed, the person can post, comment or block the person.

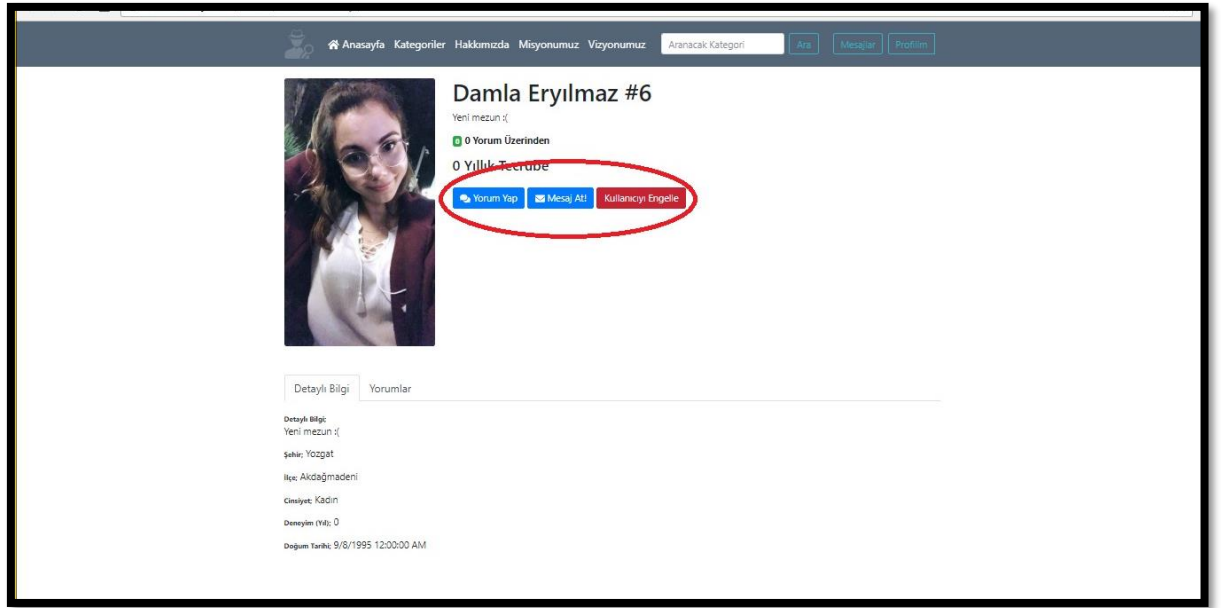

Figure66: Profile screen of other user

When the user click on the Comment button, the commenting window opens.

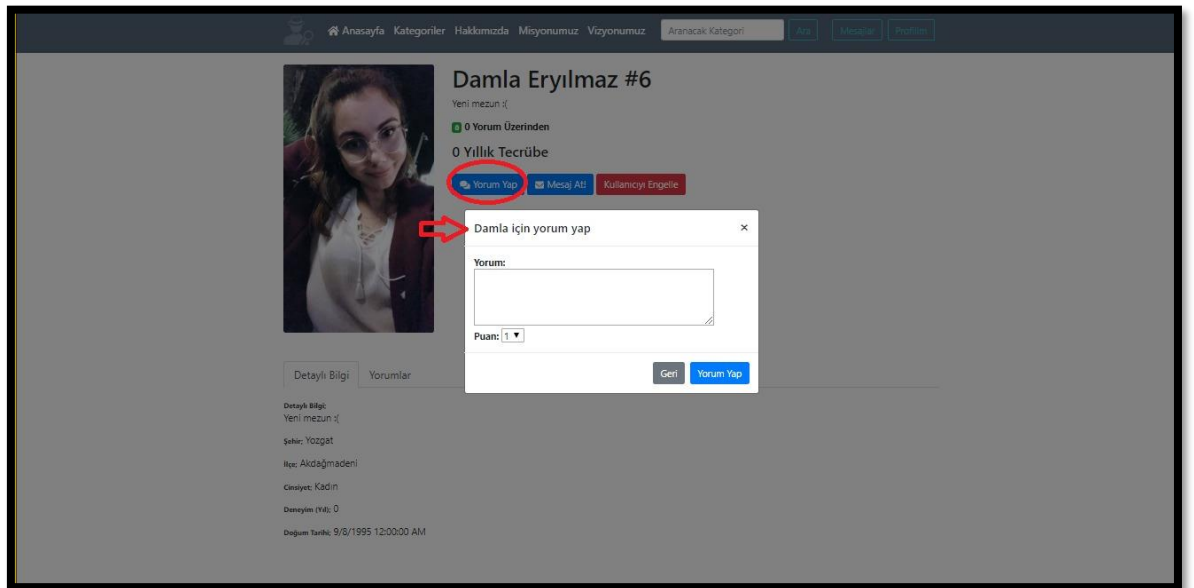

Figure67: Commenting the user

When the message is clicked, the message writing window opens.

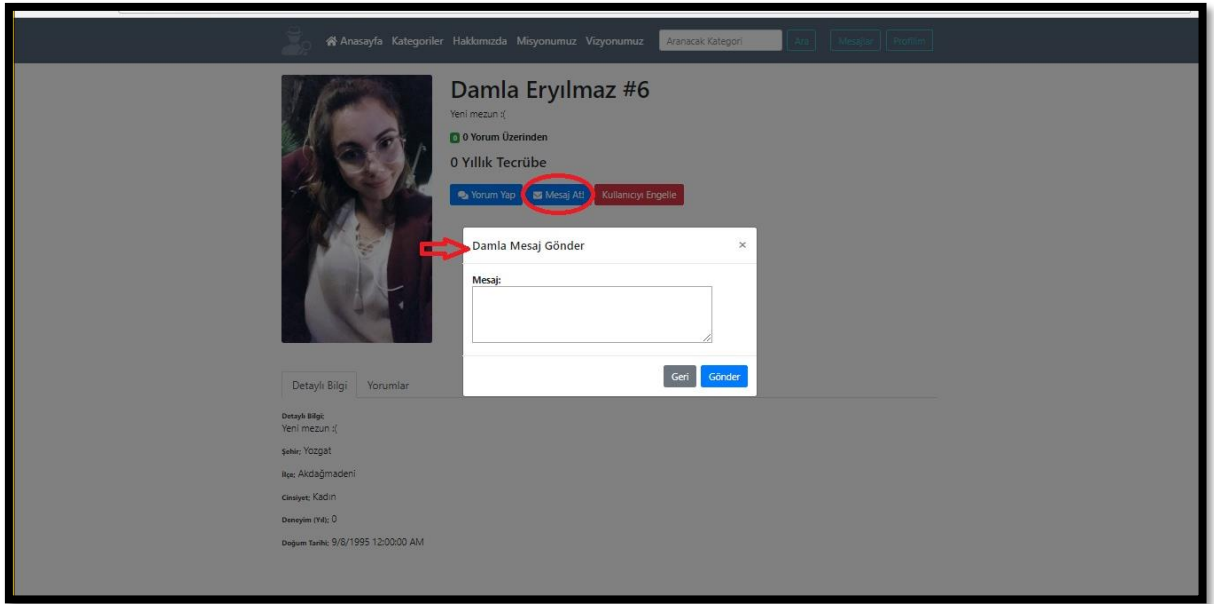

Figure68: Sendig message button to user

“Are you sure you want to block?” message appears when the user clicks the block button page opens.

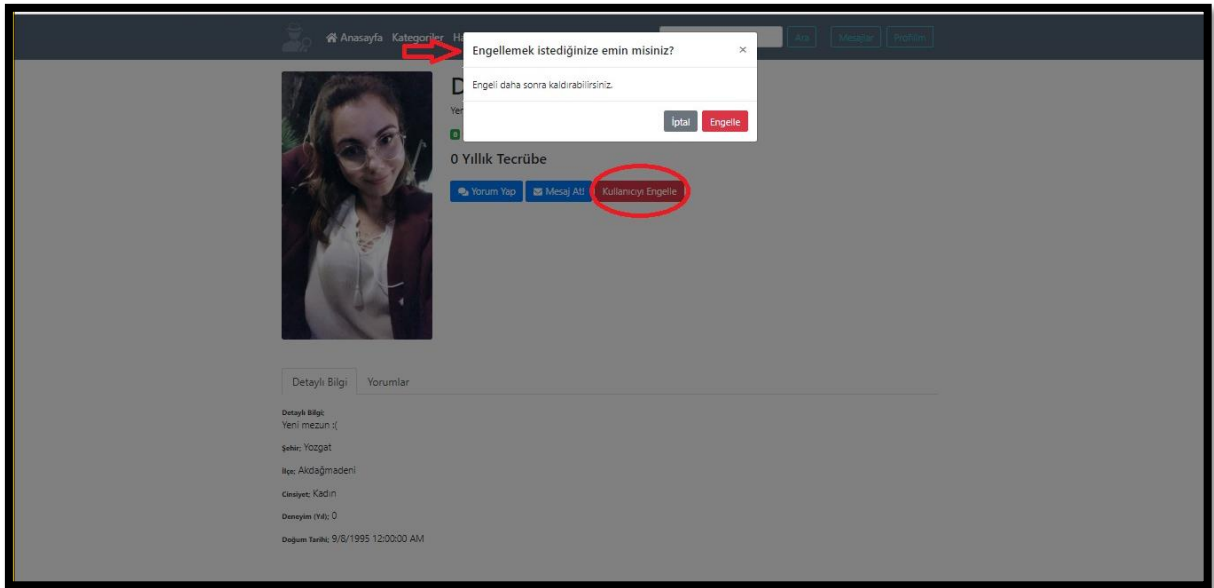

Figure69: Block user screen

The user who wants to unblock the user can remove it using this button. The site gives you a confirmation that you want to remove the user.

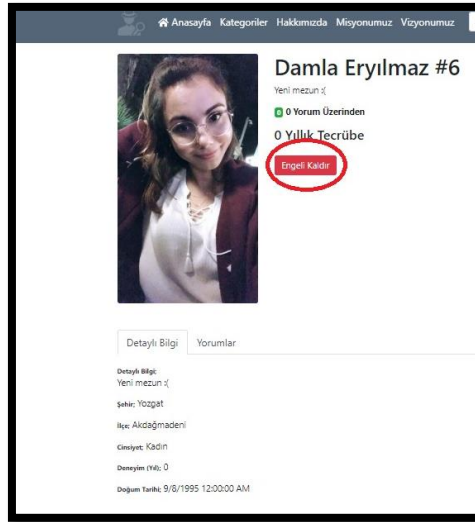

Figure70: Unblock the user

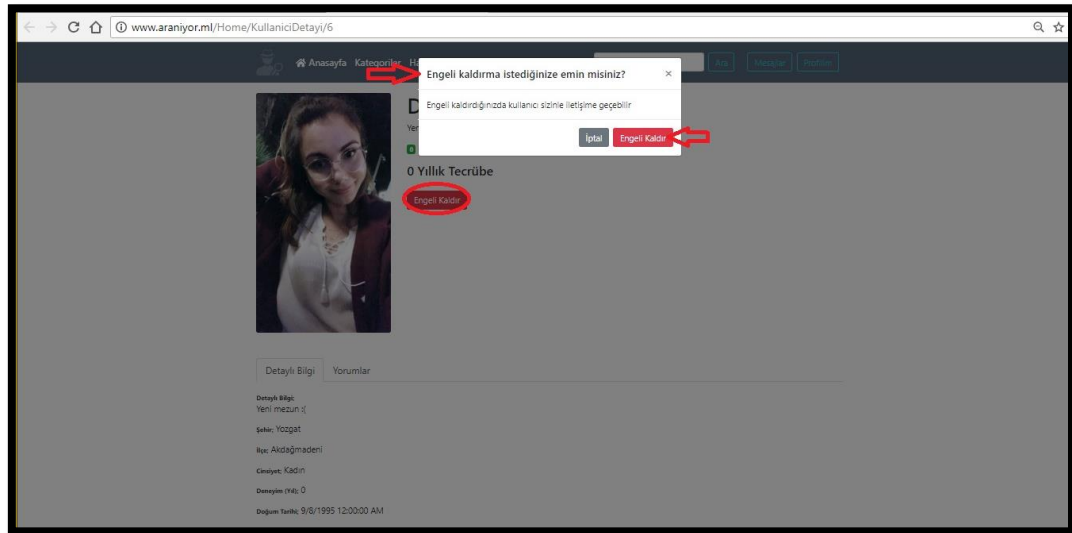

Figure71: Unblock the user screen

When a new message arrives, a red icon appears next to the Messages button.

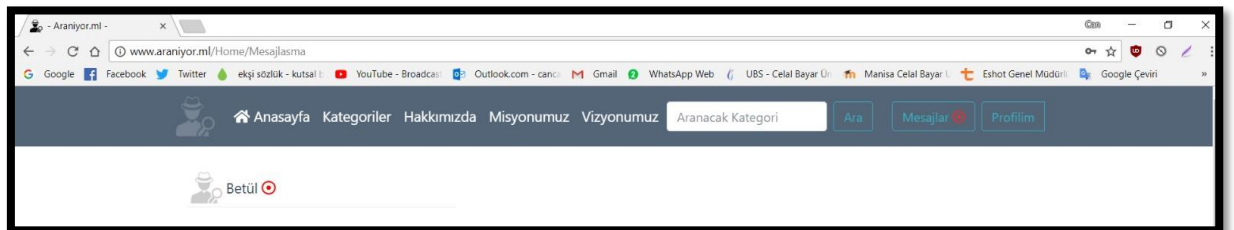

Figure72: Message notification

We can not send a message to the blocked user, so the message sending area is empty. The block of the other user must be removed in order to be able to send a message. The site sends a warning message that the user will not be able to post.

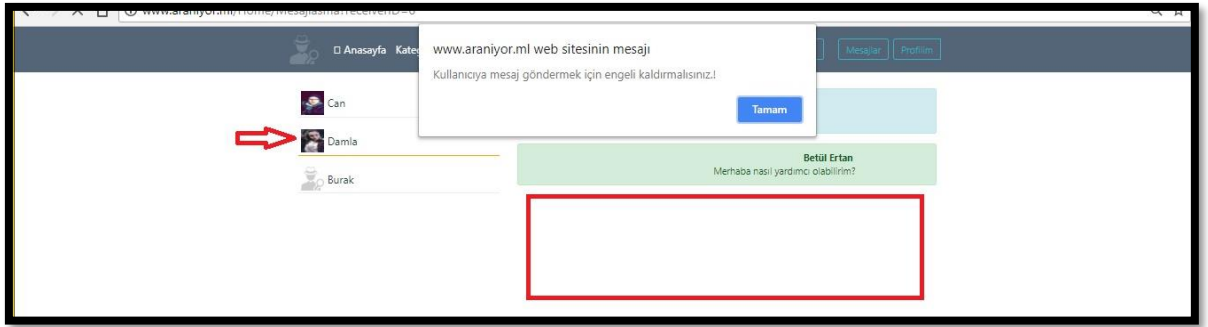

Figure73: Message to blocked users

The user can search any category from the search box on the main page.

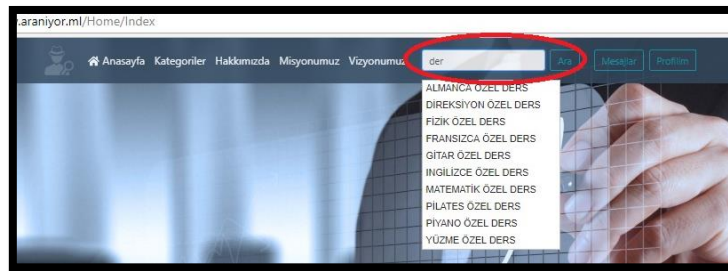

Figure74: Searching on search box

The users in the category we are looking for are listed.

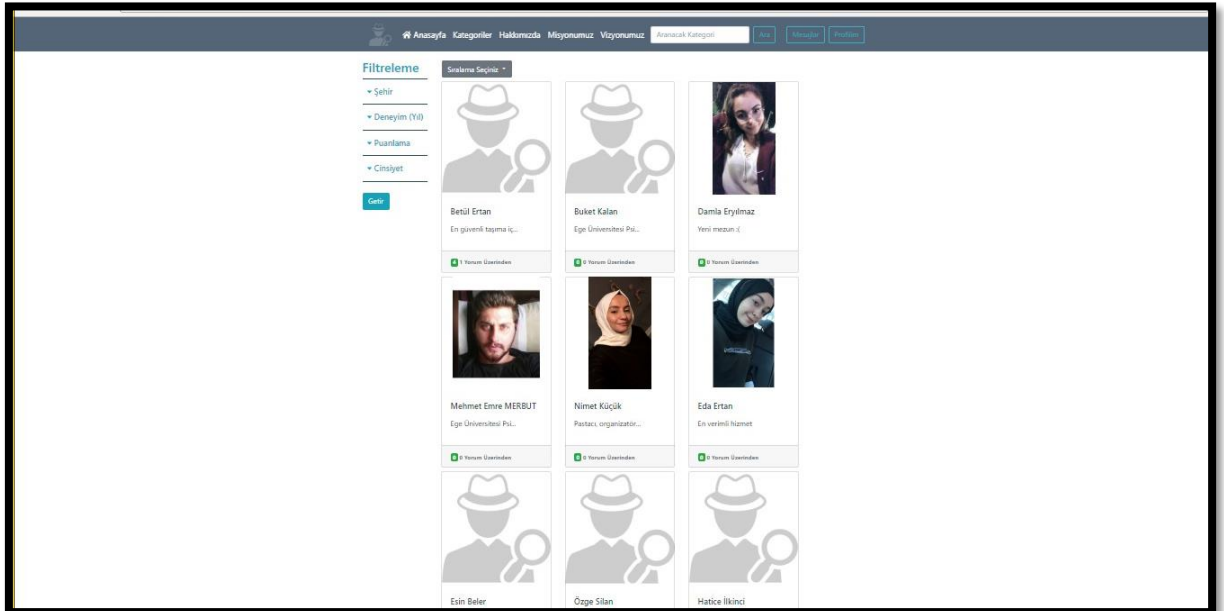

Figure75: Listing users from chosen category

Users listed in the category user is looking for can be filtered from the filter boxes on the left side by city, experience year, rating and gender.

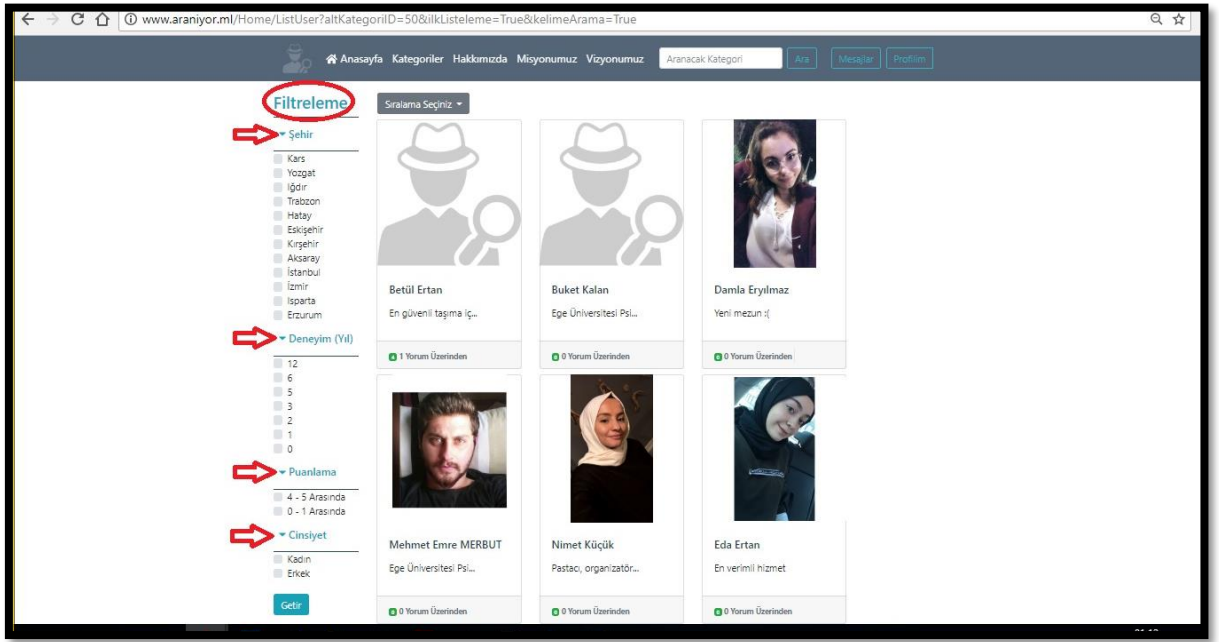

Figure76: Filtering the users

Users who are listed in the category we are looking for can choose sorting from the sort box at the top by decreasing by rate, increasing by rate, decreasing by experiment and increasing by experiment.

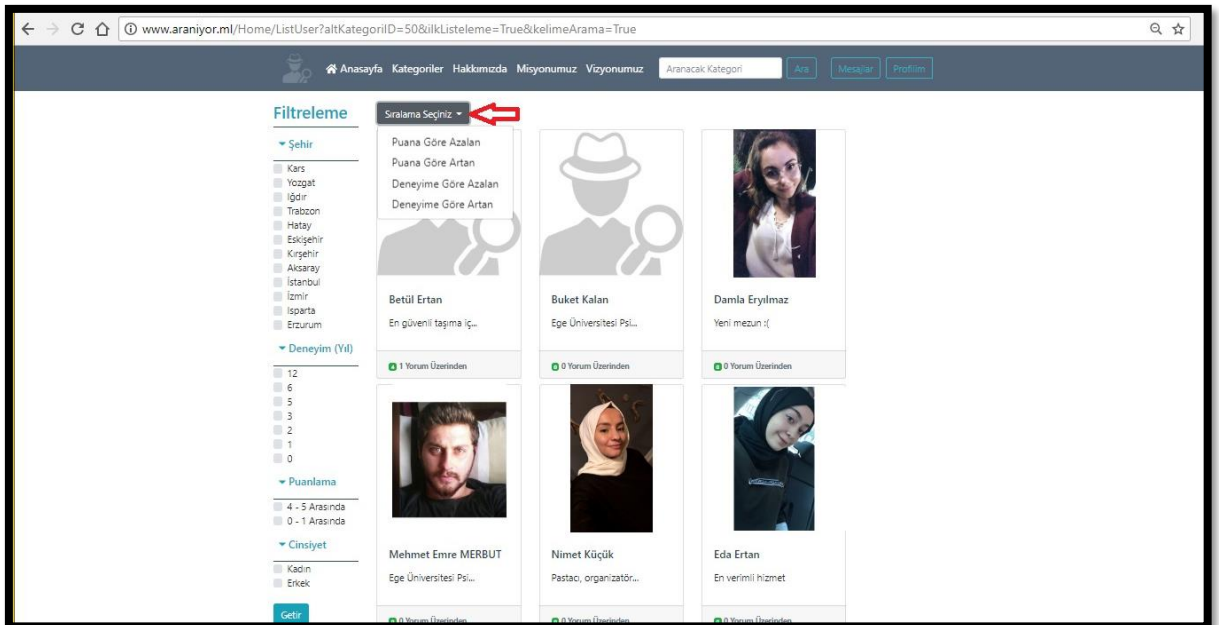

Figure77: Sorting the users

Conclusion

Turkey as well as our common feature of all websites that are currently available in our ulaşmamız the solution to our problem quickly. This means loss of time for users and disadvantage. On our own webpage, our goal is to reach the solution in the fastest way possible. For example, when you need a locksmith, you can find the right locksmith in the same way as any other web site, but unlike the others, we do not have to offer any more, and we instantly make time and cash.

We benefited from the internet for our project. We use github for follow the last changes of our project and follow the group member activities easily.

When we finished our project like our plan. We have not experienced any deviation. At this point, our web site can be used effectively. Members can register, log in, sign in and be service supplier.

Our plans are to make our project for Android and IOS an application for the future. We must advertise our website and try to globalize.
